# Preparing Your Vehicle

Once you've arranged how your vehicle will get to the auction, you'll need to prepare it.

Start with documentation as you may find some missing or requiring further verification.

Check your vehicle for any removable items (cigarette lighters, radio fronts, tool kits, etc.) and place these in a bag inside the vehicle.

It is also recommended that the car arrives in as close to showroom-ready condition as possible, cleaned inside and out. This should be done as close to the auction as possible.
